What is crystal Protein "Filaggrin"

Filaggrin is a protein that is vital for skin cells to mature properly into the tough, outermost protective layer of our skin. The new upgraded formula not only makes melanin invisible, but also boost crystalline protein that completely reflect the light, defend UV as the first line and reveal skin with radiant whitening.

THE ULTIMATE SUN PROTECTION

A heavy-duty sunscreen lotion that protects you from the sun that are even behind the clouds and UVA/UVB rays

care
SUN+

[WHY USE SUNSCREEN IN THE WINTERS]

You tend to spend longer hours in the sun during winters, which may result in over exposure to its harmful rays, that can be effectively blocked by a good, broad spectrum sunscreen

UVB burning rays affect the surface epidermis, giving skin a red, tight, painful feel.

UVA ageing rays penetrate deeper into the dermis, & can contribute to skin cancer.

AVON CARE SUN sunscreen protects your skin against both UVA & UVB rays.
